KUEM

INFRASTRUCTURE AND PROCESS DIGITALIZATION

From device to decision.

We connect field devices, existing systems and data in the Nexavia platform for clear monitoring, timely alerts and better decisions.

www.kuem.si

HOW IT WORKS

We connect your existing infrastructure.

Nexavia combines data from field devices, measurements and existing information systems. It provides a unified view of infrastructure, faster deviation detection and more effective action.

Unified overview
All important data, systems and locations in one place.

Timely alerts
Deviations and events reach the responsible person in time.

Data for better decisions
Analytics supports infrastructure management and action planning.

SUCCESS STORIES

≈ 1,000

gas meters connected via NB-IoT

DOMPLAN

4,000

LoRaWAN adapters for remote gas meter reading, deployment ongoing

SOMBOR

INDUSTRIES

Water and utilities · Energy · Environment · Mobility · Public infrastructure

Let’s start with one concrete challenge.
